

■ summary

Five years in influencer and content marketing, most recently running 50+ integrations and around 500,000 views a month on budgets of \$15,000+. I find and vet creators, negotiate terms, write briefs and scripts, and track what each campaign brings in through UTM links and promo codes. I've worked across TikTok, Instagram, YouTube and Twitch for European and international markets, and freelanced for fashion and lifestyle clients. I also build small AI tools for the routine parts of the job: script drafts, campaign reports, sorting creator replies. Computer engineering degree.
